Roadmap

(2018 – 2019)

Q1 2018

SOFTWARE (SW)

- Raw functions (s/v/e/d/)

- File Storage (swarm, IPFS, storj)

- Wallet multi-asset (eth, btc, iota,..)

- dApps Store

- CLI and UI implementations

- eLogin basic version (anon IDs)

- BLOCKTIME initial rollout

- First round of dApps integrations:

  - Status, ED, Aragon, Flyp.me, Gnosis

- Alpha/mvp of ESS Framework

PUBLIC (PUB)

- Community engagement bonuses

- Bounty campaigns

- Meetups / conferences worldwide

- Self-hosted regular meetup Ams

Q2 2018

SOFTWARE (SW)

- Additional backend/home modules

- Custom VPN, TOR, Mysterium

- Single-chain nodes and modules:

    - ETH, BTC, IOTA, LTC, etcetera..

- 2nd/3rd round of dApps integrations

- eLogin 3rd-party ID management

- On-chain modules initial rollout

- Minimal and low-res adaptations

- Decentralized repositories

- First beta of the ESS framework

PUBLIC (PUB)

- 1st ESS Hackathon

- Development bounties

- Security / bug reporting bounties

- Meetups / conferences worldwide

- Self-hosted regular meetup 2 cities

Q3 2018

essentia.one

SOFTWARE (SW)

- Full BLOCKTIME rollout
- Custom derivation paths
- Framework CLI automation/scripts
- Alpha ESS token layer
- Cross-chain modules initial rollout
- Alpha ID system (anon, pseudo)
- Login second stage (+pseudo)
- 4th round of dApps integrations
- Native mobile app beta
- ESS framework second beta

PUBLIC (PUB)

- In-framework incentives
- 2nd ESS Hackathon
- Development bounties
- Security / bug reporting bounties
- Public beta-testing program start
- Meetups / conferences worldwide
- Self-hosted regular meetup 3 cities

Q4 2018

SOFTWARE (SW)

- Advanced features and settings
- eLogin third stage rollout (+KYC)
- Decentralized ID beta (an,ps,kyc)
- eDNS/NS consolidation
- Beta ESS Token layer / recycle
- First purely-on-chain modules
- State channel layer initial rollout
- Standalone modules and nodes
- Low-res environments and IoT (beta)
- Mobile RC
- ESS framework third beta

PUBLIC (PUB)

- 1st ESS ideas contest
- Use incentivization programs (ess)
- 3rd ESS Hackathon
- Development bounties
- Security / bug reporting bounties
- Meetups / conferences worldwide
- Self-hosted regular meetup 3 cities

Q1/2 2019

essentia.one

SOFTWARE (SW)

- Decentralized ID full rollout
- ESS token layer complete
- State channels: done
- Move/clone modules on-chain (scs)
- Virtualization of resources (intro)
- Cross/multi-chain full operability
- Fully customizable framework
- Mobile stable release (android, osx)
- Multi-language implementations
- Decentralized governance (intro)
- ESS framework RC and stable

PUBLIC (PUB)

- ESSDEV zero (devs conference)
- Follow up of previous programs

Q3/4 2019

essentia.one

SOFTWARE (SW)

- Self-sustainability protocol (recycle)
- Virtualization of the resources
- Resource sharing
- Distributed computing
- Mission-critical deployments
- Decentralized governance
- Low-res environments and IoT full
- SW-based native oracles tests
- Decentralized ESS framework

PUBLIC (PUB)

- 1st ESSCON + Hackathon
- Follow up
